

We, the undersigned, are a group of senior doctors and nurses at Epsom and St Helier hospitals. We are a very strong team, and together have achieved a great deal in recent years. We believe that the Epsom and St Helier team is better together, and that we should continue to work as one team, one trust.

The majority of our patients will continue to be seen as they are now at either Epsom or St Helier hospitals, however, we support the proposal to make our buildings fit for purpose and develop a single, state-of-the-art facility to care for our sickest patients; those with the most complex care needs.

These patients will benefit from the combined expertise and skill of our doctors, nurses and other specialist staff offering the best care for our local population.

Over recent years we have increasingly worked together as a single team across Epsom and St Helier and we believe that our future success relies on our unitary team, stronger together, serving the whole catchment area of Epsom and St Helier.

Yours sincerely....

**Our consultants**

**Medical Directors**

James Marsh  
Ruth Charlton

**Associate Medical Directors**

Pauline Swift (Research,  
Development and Innovation)
