## Sutton Save St Helier Hospital Campaign

Local residents in Sutton want the new hospital built on the current St Helier site instead of Belmont or Epsom. We are against the closure of any of St Helier Hospital's current services, including the A&E and a consultant led maternity unit. We believe closure of any services at St Helier will have a devastating impact on the health and well-being of our community. We want the St Helier and Epsom Trust Board to stop wasting money on this consultation and instead we want these funds to be spent on providing NHS services for patients.
